

HEMICHORDATA

- worm like animals
- closely related To Chordates

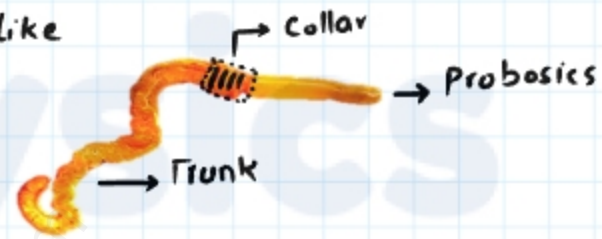

HABITAT

- Found in shallow ocean bottom

BODY STRUCTURE

- Soft Body , worm Like

- Probosics
- collar
- Trunk

BODY WALL

- unicellular epidermis

DIGESTIVE SYSTEM

- Tube - like tract

RESPIRATORY SYSTEM

- Gill slits → Behind The collar

EXCRETION

- Glomerulus

CIRCULATORY SYSTEM

- Vessels → Median dorsal
Median ventral

NERVOUS SYSTEM

- Sub-epidermal plexus → cells and fibres

EXAMPLES

Balanoglossus

Saccoglossus
